

On the 6th, 7th and 8th of March we have WORLD OF MATHS attending our school for an incursion.

For those of you who remember the fun learning time students had with Professor Maths, this will be very similar.

They will run two types of activities; problem solving and guided discovery activities.

They support our belief that when students can solve advanced problems when they have the time and freedom to pursue their own paths in trying to solve problems. The students can experience mathematics related to practical and real-life situations. World of Maths is an enjoyable and attractive situation which makes the students want to think. It helps develop skills necessary to work in small groups as an effective way of learning mathematics.

Notices will be coming out soon.

We can't wait!
